SCOPE

This policy establishes Delta Laboratories Pty Limited's approach to managing its environmental responsibilities and impacts across its activities and operations. Delta applies a life-cycle perspective to its activities, products and services, including relevant stages it can control or influence. Delta is committed to improving environmental performance through efficient use of energy, water and other resources, waste reduction and resource recovery, pollution prevention and progressively reducing greenhouse gas emissions.

This policy supports Delta's Environmental Management System, which is maintained in alignment with ISO 14001.

POLICY STATEMENT

Delta Laboratories Pty Limited is committed to conducting its activities in an environmentally responsible manner and continually improving its Environmental Management System and environmental performance.

Delta Laboratories Pty Limited is committed to:

- Protecting the environment, including biodiversity and ecosystems where relevant to Delta's activities.
- Preventing or minimising adverse environmental impacts associated with Delta's activities, products and services.
- Preventing pollution and mitigating adverse impacts arising from Delta's operations.
- Using energy, water and other natural resources efficiently, minimising waste and supporting reuse and resource recovery where practicable.
- Considering relevant environmental conditions, including climate change, resource availability, biodiversity and ecosystem health, when evaluating environmental risks and opportunities.
- Considering relevant needs and expectations of interested parties and determining which become compliance obligations or are otherwise addressed through the EMS.

Delta Laboratories Pty Limited will do this by:

- Meeting applicable environmental compliance obligations, including legal, regulatory and other requirements Delta has to or chooses to comply with.
- Protecting biodiversity and ecosystems by preventing or minimising adverse impacts on air, water, land, flora and fauna.
- Improving resource efficiency and minimising waste within Delta's operations and relevant life-cycle stages it can control or influence.
- Responding appropriately to relevant environmental concerns from customers, regulators, the community and other interested parties.
- Engaging with relevant interested parties on environmental matters where appropriate.
- Providing appropriate information, training and resources to support environmental responsibilities and the effectiveness of the EMS.
- Establishing, monitoring and reviewing environmental objectives and targets annually.
- Continually improving the EMS to enhance environmental performance.
- Integrating relevant environmental risks and opportunities into planning and decision-making.

Delta's EMS provides the framework for implementing, monitoring and reviewing environmental objectives, actions, controls and performance. This policy is communicated within Delta, made available to relevant interested parties and reviewed at planned intervals or when significant changes occur.

This policy applies to Delta's operations and to employees, visitors, contractors and consultants within the scope of the EMS.

Daniel Whateley
Chief Executive Officer
